Introduction

The Espace Plateau, also referred to as “The Kitchen”, is a multifunctional space built specifically as a sound stage for film and television. It’s outfitted with a professional-grade kitchen that can be hidden behind collapsible walls or pulled forward into the space if it’s to become the main attraction. The Espace Plateau can be coupled with the Rhino if needed, but it does have its own street access off St-Paul Street. It’s equipped with a permanent PA system and a blinds system that can plunge the space into complete darkness on demand. Fees may apply if you plan on using the kitchen equipment.

Dimensions

Please use the latest version of the Technical Plan available on our website for the most up-to-date information.

Capacity

The Espace Plateau has a maximum capacity of 295 people when cleared of furniture or equipment. Please note that capacity in the Espace Plateau is subject to change based on the specific layout and furniture configuration of your event. The Phi Centre reserves the right to amend posted capacity to reflect constraints of a specific setup and ensure a safe and pleasant experience for our guests.

Interconnectivity

The Phi Centre's infrastructure offers many possibilities. Interconnectivity patch plates are available throughout the building and link every space together via the central data hub. These patch plates have provisions for digital, video and audio feeds, allowing for a full-duplex experience from one space to another, a live digital recording of a performance, a webcast feed of your event and now, a connection to the Quartier des Spectacles' fibre-optic network. To learn more about what the Centre's interconnectivity can do for you, speak with the Studios and Technology Director.

Electricity

There are two connection points equipped with a Camlock-type disconnect in the basement, accessible within the Espace Plateau via a cable tray. Please discuss your electrical needs with the Technical Director.

1 x 208 V / 3 phases / 200 amp.

1 x 208 V / 3 phases / 100 amp.

Lighting

The Espace Plateau is outfitted with a permanent fixed grill made of 1.9" OD steel, rated to a linear load of 37 kg/meter for a uniformly distributed load.

The Espace Plateau has various ceiling-mounted and wall-mounted DMX patch plates for easy installation. The Phi Centre encourages the use of LED fixtures but allows use of traditional lighting equipment. There is no permanently installed or assigned

lighting equipment in the Espace Plateau. Please speak with the Technical Director if you intend to bring your own lighting equipment.

Please ask for our equipment rental document for more options.

Audio

PA System:

6 x Meyer MM4 powered speakers

2 x Meyer MM10 powered subwoofers

1 x Yamaha MTX5-D Multifunction matrix processor

Desk:

1 x Behringer X32 Producer (available upon reservation)

Please ask for our equipment rental document for more options.

Video

There is no permanent video equipment in the Espace Plateau.

Please ask for our equipment rental document for more options.

Kitchen Equipment

1 x Garland S686 Series Sentry Electric Restaurant Range

1 x Rational Oven Model 61E

1 x True GDM-41 Refrigerator

1 x True T-23 Refrigerator

1 x Jet-Tech F-18 Dish-washer

2 x True TUC-48 Cooling Tables

Restrictions

The use of any and all types of fasteners (screws, nails, double-sided tape, etc.) is strictly regulated throughout the Phi Centre. Since the building is classified as historic, the unauthorized use of fasteners will result in reparation and restoration charges. The use of pyrotechnic effects, naked flames, confetti and the distribution of stickers are strictly forbidden at all times throughout the Phi Centre.

Loading/Unloading

Deliveries should be directed to the Evans Court alley on St-Paul Street, right before the corner of St-Pierre. Only cube trucks measuring up to 16' can access the alley. Any longer vehicles will need to unload from St-Paul Street. All truck movements must be coordinated with the Technical Director. No vehicle may remain in the alley without its driver present at all times, as neighbouring residents and businesses rely on access to the alleyway. Vehicles must be parked off premises once unloaded.

Storage

There are no storage or staging areas at the Phi Centre for empty and unused cases. All equipment must be stored within the venue space, or storage arranged off premises. Please discuss this restriction with the Technical Director to avoid last-minute fees and inconveniences. All deliveries and pick-ups must take place on the day of the event.

Hospitality

A green room and two dressing rooms are available on the third floor, accessible either by the stairs or the elevator. These rooms are not exclusive to any venue and must be reserved ahead of time if needed. Please speak with your assigned event coordinator to ensure availability. Fees may apply.
